Notes on Program Versions 4.70 and 4.80

Version 4.70 is currently used in kiosk being shipped as of spring of 2013. Is known to be stable and currently supports all domestic applications.

Version 4.80 is the most recent version, which adds the ability to edit the “standard pump” data in the cost comparison screen. This allows using a 50hz or alternate pump as a comparator pump to the Pentair live pump on the display. This version was created to support worldwide sales

Before installing on any computers with older DAQ versions please uninstall K-Lite Codac Pack and the version of Pump Data Acquisition on the computer
